Summary

Full-stack engineer (React, Next.js, TypeScript, Go) who builds AI features and tools that make technical systems usable by non-engineers, like an LLM pipeline that turns engineering activity into client updates.

Experience

Full-Stack Developer, Axiaras · Melbourne, Australia · June 2025 – November 2025

- Built an LLM pipeline that turns raw Jira and GitHub activity into plain-language client updates
- Shipped an AI timeline endpoint that summarizes any date range as a summary or weekly digest
- Owned the Jira integration end to end: OAuth install, token refresh and per-project webhooks
- Built multi-tenant org onboarding on Clerk: invitations, join requests and role management
- Scaffolded a Cloudflare Workers integrations service with rate limiting and Terraform
- Wrote 200+ automated tests across TypeScript services and Go webhook handlers

Full-Stack Developer, Squared · Illinois, United States · November 2024 – June 2025

- Introduced Prismic CMS so non-engineers could publish docs without a deploy
- Built task dependencies end to end, from schema and RPC service to “blocked by” UI
- Extended the Slate rich-text editor to 3 surfaces with task autocomplete, code blocks and MDX conversion
- Built @mention notifications with hover-card previews for tasks and comments
- Automated Postgres backups to S3 with GitHub Actions and seeded local DBs from Neon

Projects

Party Planner, Creator · November 2025 – Present

- Built a tabletop campaign manager with TanStack Start and a Go ConnectRPC API on Neon
- Developed AI-first with Claude Code, using a CLAUDE.md playbook that agents follow

Skills

- **Languages:** TypeScript, Go
- **AI:** OpenAI API, LLM prompt design, Claude Code
- **Frontend:** React, Next.js, Tailwind CSS, TanStack Query/Router, Zustand
- **Backend:** Node.js, Hono, ConnectRPC, Protobuf, Drizzle, Prisma
- **Infra:** Cloudflare Workers, AWS, Terraform, Docker, GitHub Actions, Neon Postgres
